SMARTSLAVE AND MICROSMARTSLAVE 30-CHANNEL FIRING MODULE – 50V

Practicality and control for large-scale shows

Piroshow Smart modules are ideal for complex sequences and large-scale shows, offering maximum practicality and significant time savings.
SmartSlave and MicroSmartSlave can be easily moved from one position to another and installed even in limited or remote spaces.

30 CHANNELS • 50V • NO INTERNAL BATTERY

50V | **SUPERSLAVE** | **MASTER**

FEATURES

FAST INSTALLATION, SAFETY, AND MAXIMUM EFFICIENCY

SmartSlave and MicroSmartSlave are the latest-generation solution designed to reduce setup time and field effort.
Lightweight, compact, and easy to transport, they are also ideal for limited spaces or remote positions.
Safety during testing is ensured by powering only the control circuit, while the absence of an internal battery speeds up setup, reduces maintenance, and eliminates risks of degradation or leakage.
The integrated protective cover shields connectors and wiring from incandescent debris during the show.

MODULAR EXPANSION AND LARGE-SCALE CONTROL

The SuperSlave can power up to 15 SmartSlave modules, while maintaining all of its programmable sequencing functions.
The connection between modules is simple and immediate, using a common twisted pair cable or a standard electrical cable.
With the Master FullPower, the system can manage up to 126 SmartSlave modules, reaching a total of 3780 individual firing channels.
A simple, fast, and cost-effective solution designed for large-scale shows and highly complex choreographies.

MAIN SPECIFICATIONS

30 Channels	Firmware upgradable;
Firing voltage 47V – 5 ms	CE marking – ISO 9001 certification;
Minimum time between two consecutive firings: 0.01 s	International warranty;
Channel continuity test	**Dimensions:** 90 × 420 × 80 mm;
Weather-resistant	**Weight:** 2 kg.
